1.0 INTRODUCTION

This Functional Requirements Document (FRD) serves as a comprehensive extension to the proposal document, providing detailed specifications and additional requirements that build upon the features outlined in the proposal.

2.0 BUSINESS REQUIREMENTS OVERVIEW

The B2B Amadeus system aims to provide a seamless online booking experience for flights, hotels, packages, transfers, car rentals, and travel insurance. It integrates with multiple GDS systems, offers cross-selling capabilities, and provides administrative control via a centralized panel. This project fulfills the need for efficient travel service booking, package management, contract distribution, and agent reporting.

3.0 FUNCTIONAL REQUIREMENTS

System Display

- Show the lowest fare available for the day, categorized by airline and destination.
- Display ATL Flyers.
- Display the available credit balance.

B2B Agent Dashboard

- Display the available credit balance.
- Highlight immediate time-limited reservations.
- Emphasize non-ticketed and ticketed reservations.

Reports for Agent

- Generate TO/GP reports (daily, monthly, yearly) with comparisons.
- Provide reports categorized by airline, destination, refund/void, cross-sell products, and customer segments.
- Include customer profiles.

Other Options for B2B agents

Pop-up Messages with Special Notes

Example: "Insufficient credit—please top up your account"

User Registration

- Comprehensive user registration form.

Feedback and Support

- Integrated feedback and helpdesk functionality.

Visa Timatic Option

- Add a Visa Timatic tool for efficient and error-free visa processing

Comprehensive Booking Facility

- Unified platform for booking flights, hotels, and other services.

Auto Re-Issue and Auto Refund

- Implement ATC and TRF automated solutions with a markup.

Immediate Payment Updates

- Ensure payments reflect instantly, and top-ups activate immediately.

Lowest Fare Display

- Display daily lowest fares categorized by destination and airline.

Unified Platform for LCC and NDC Fares

- Consolidate both fare types into a single platform for convenience.

Minimize ADMs

- Include an Amadeus penalty notifier to reduce ADMs.

Voucher/Invoice

- Auto raise voucher/invoice

ATL Reports (Individual & All)

- New customer onboarding details report.
- TO/GP reports (daily, monthly, yearly) with comparisons.
- Reports by airline, destination, and customer segment.
- Ticket issue, re-issue, refund, and void reports.
- Payment method report.
- Cross-sell product-wise report.
- Passenger count report.
- GDS-wise, LCC, and non-BSP reports.

ATL Admin Dashboard View

- Display top 5 agents, airlines, destinations, and cash agents.
- TO/GP comparisons by airline, sector, and destination (monthly and yearly).
- Segment count for GDS/airlines.
- Passenger count reports.

ATL Additional Options

- Fare optimizer.
- ATC (Automated Ticket Changes).
- TRF (Ticket Refund Functionality).
- Service fees for issuance, re-issue, and refunds (markup/markdown).
- Auto voucher/invoice generation.
- Special fare updates.

Loyalty Program

- Integrate with the existing loyalty program.

GDS Segment Count

- Display GDS wise segments count

Recognition Program for B2B Agents

- Integrate a recognition program to reward and motivate agents

4.0 NON-FUNCTIONAL REQUIREMENTS

- **Performance:** Ensure high system performance with minimal downtime.
- **Scalability:** Support increasing numbers of agents and transactions.
- **Security:** Implement robust authentication and data protection.
- **Usability:** Provide intuitive and user-friendly interfaces.
- **Payment Methods:** Offer diverse and easy-to-use payment options.
- **Quick Reissuing:** Enable fast and efficient ticket reissuing.
- **Customer Support:** Provide 24/7 customer assistance.

5.0 ASSUMPTIONS AND CONSTRAINTS

- Integration with third-party suppliers and GDS is dependent on their API availability and compatibility.
- Multi-currency functionality relies on real-time exchange rate updates.

6.0 GLOSSARY

- **FIT:** Fully Independent Traveler.
- **GIT:** Group Inclusive Tour.
- **TO/GP:** Turnover/Gross Profit.
- **GDS:** Global Distribution System.
- **ATC:** Automated Ticket Changes.
- **TRF:** Ticket Refund Functionality.
